I have seen a demo in a big box store and the picture is impressive.

Two key questions:

Is 4K content available?

Do you want to be an early adopter on the bleeding edge?

The 4k DVD players and TVs look to be double the cost of 1080P which is less than the difference between 480 and 1080 when HD was fist released.

I would wait till 4k content is available. The cost should drop then. Remember when there was a higher premium for Blu Ray till it became common.
