Started the completion of the center channel speaker. Ordered a used JBL 2226H off eBay. Arrived in great condition, especially considering it has a sticker from 1996 on the magnet.

Ordered a crossover from Wayne this morning. Hope to have last speaker up and running by next weekend.

I got rid of the two sealed enclosures for the LAB12's and built two 100 L ported enclosures (tuned to 22 Hz per winISD).
