It's been a looooong trip...the speakers have literally been around the world.

They sound a lot better after the refinish job, apparently during the transit from Cambodia the bolts holding on the DE250 CD's came loose, on both speakers (that or I didn't get them tight 3 yrs ago, I'm going with trouble in transit so I don't look stooped!). Amazing how much more top end there is now.

Great news about the crossover shipping, I'm putting on the final Duratex coats on the center channel speaker today.
