Subject: Re: 4 Pi speakers (Yuichi 480FL horn) Posted by Wayne Parham on Wed, 29 Oct 2014 13:14:58 GMT View Forum Message <> Reply to Message

Speakers with flux modulation control sound better than those without. That's the benefit of the JBL drivers. But I do think whichever driver you use, you'll probably want to check the crossover nd make sure it's adjusted for proper summing. The crossover is integrally tied to the horn and drivers used.
