I found the following SM58.cal file out on the internet, and loaded it.

20 -15  
50 -7  
100 -1  
120 0  
1000 0  
2000 +1  
4000 +4  
5000 +5  
7000 +3  
7500 +2  
9000 +3  
10000 +4  
15000 -5  
20000 -15

My microphone is knockoff, so I don't expect those figures to be exact. And my room is terrible: 16' ceilings, ceramic tile floors, very few treatments. I think the measurements look pretty good all considered, but I'm not entirely sure what they're expected to look like in my case.
