I found the following SM58.cal file out on the internet, and loaded it.

20 -15
50 -7
100 -1
120 0
1000 0
2000 +1
4000 +4
5000 +5
7000 +3
7500 +2
9000 +3
10000 +4
15000 -5
20000 -15

My microphone is knockoff, so I don't expect those figures to be exact. And my room is terrible: 16' ceilings, ceramic tile floors, very few treatments. I think the measurements look pretty good all considered, but I'm not entirely sure what they're expected to look like in my case.
