Hey Ben, welcome.

As you peruse, you'll see Wayne has amassed a serious amount of info and then a couple of years back arranged it into the FAQs. (Whew!)

It's a lot to go through so bouncing back and forth with specific questions is a great approach.

I'm gonna go out and say it:

Wayne's 7 Pi speaker is the best corner speaker out there!

Tried and true, professionally documented/measured, precise plans, etc ... oh, and free, robust, life-time support as you are experiencing!

OK, the big '?'

Corner speakers need corners. Tell us about your room.

The 7 Pi works best on the short wall, crossing in front of the listener with ~5ft of uninterrupted wall on both sides of the speaker. (Ideal)

Wayne [finalllllllllllly,] has the flat-pack midhorn kits back in stock so if you're not up-to-snuff with wood working (like me) you can easily get goin'

Speaking of get goin', the 7 Pi also has many entry points!

inexpensive: PSD2002/alpha or delta10 and your own bassbin

to

Full-on best drivers, xover components, cabinets.

Cheers,
Jeff
