Finally Finished!!!

Last photo before buttoning them all up:

Here's they are in room finished!

As you can see my old speakers are currently being used as stands.

I'll post more on sound later, but these are by far the best speakers I've ever heard in a living room. I've watched a few Blu-Rays of Live shows from Umphrey's McGee (check them out) and I can honestly say it sounds better in my living room then it did when I was there. They are extremely easy to listen too. They play details extremely well. I'm very happy.

My 3pi's aren't getting full power yet waiting on one more thing so I can hook up the pro audio amp I picked up to power them. Then I'll post some measurements.

Thank you Wayne for all the work you do.
