Thanks Wayne.

Is your experience with the rca filters using them for a flanking subs configuration to blend with your 3pi's or 4pi's?

Ill be trying them with your 3 pi subs (flanking my 4pi's), and was wondering what crossover frequency you used (100z, 120hz, 150hz) if you did indeed use them for subs to flank your large 3pi or 4pi designs.
Or is the roll off frequency I choose mostly room dependent (how the speakers measure in my room)?

Regards!
