It's an old saying that I wanted to look more into. After a few days, I came across this:

http://www.qrg.northwestern.edu/projects/vss/docs/communications/1-what-is-wavelength.html

http://www.ncbi.nlm.nih.gov/pubmed/7525234

Maybe some of our more technical minded members can translate this for the rest of us? Can there be a scientific explanation for that old saying?
