I was car shopping for my daughter a few weeks ago and saw a 1974 El Camino for \$3,000. It was a project car and one of the projects seemed to be the audio system. There was none. I was just on E-Bay and saw quite a few vintage '70's models 8-track players. This is on my wish list for Christmas: A '70's model vehicle with a '70's model 8-track player.

Who's with me?
