Subject: Re: Wireless speakers vs wired Posted by BeccaH on Sun, 15 May 2016 16:49:39 GMT View Forum Message <> Reply to Message

Thank you Miami. I'm going to ask what might be a pretty dumb question now...is the sound quality the same either way? In my head, having a wire connect the speaker to the source implies that nothing can interfere with the sound as it travels. I guess I'm wondering whether wireless speakers can suffer from 'interference'?
