Subject: Re: Help me choose the apropriate speaker to built Posted by nik72 on Thu, 21 Jul 2016 15:59:42 GMT View Forum Message <> Reply to Message

Looking for tweeters and woofers in my country (I wish there were no customs and postage costs to buy them direct from pi speakers)

I can found VIFA DX25TG05-04 instead of DX25TG59-04 ,is it the same driver but new old stock or they are different maybe newer model upgraded ?

I assume is a change of coding since Vifa became Tymphany but I am asking to be sure.
