Subject: Placing your speakers correctly Posted by cwemoy on Mon, 15 Aug 2016 18:08:57 GMT View Forum Message <> Reply to Message

Apparently, there is a 'right' way of placing your speakers so they can sound great. I have come across information that placing the speakers up near the ceiling or tucking them inside a cabinet may not make you get the best sound quality. So I am always wondering what the proper way is?
