Subject: 4 pi speaker plans please

I've been lusting after these for a while, but I have some questions.

How far apart and how high off of the floor should these be ideally? I would like to make a custom console/tv stand combo that contains them.

Are the baffle cut outs different between the two woofer options?

Can I have the plans for the 3 and 4 pi subwoofers as well? I would like to consider incorporating them into the design.

Thanks, Kyle
