Subject: Re: Metasonix TM-4 Posted by metasonix on Wed, 28 Jul 2004 02:48:29 GMT View Forum Message <> Reply to Message

Yes. It is a true single-ended triode circuit using a triode connected 6BM8 per channel. The output transformer is the same one used in the Decware Zen amp.Gee, nobody ever asks me about the TM-4, except the usual "can I use it to drive a 4x12 guitar speaker cab?" stupidity.
