drake wrote on Tue, 28 June 2016 12:13That has to be some joke especially if it is an app that can be downloaded for free. Correct me if I am wrong but why would I need an app that analyzes or measures my phone's system? Would it this be so improvements can be made and if so, by what means?
The app actually turns the phone into an audio measurement tool. So you don't use it to analyze the phone, but for your bedroom or car. The accuracy is questionable, but for people who are looking for free software, that sounds like an option.
