Subject: 16 RPM?

I was looking at replacing a record player, and one that has just come up through freecycle has 4 speeds, 33, 45, 78 but also 16 RPM.

I don't think I've got any vinyl that plays at that speed, and all I can find online says it was 'low quality'. What is 16RPM used for, and what does it sound like? I thought this might be the right place to ask!
