Tadtone wrote on Sun, 25 December 2016 11:59 Does the laptop have bluetooth? Most do, but it isn't a given. If you check the model online you should be able to find out and get instructions. If it doesn't, you'll need to get a bluetooth USB dongle to connect.

I had no idea this was possible. My current laptop doesn't have bluetooth capability and I think it is time I got that dongle. It seems there's always a solution for anything out there.
