Subject: 18" corner horn design Posted by misentoro on Tue, 07 Feb 2017 06:46:11 GMT View Forum Message <> Reply to Message

I read on your site: "The five pi through seven pi are corner horn designs with 10", 12", and 15" woofers respectively."

Could a design with 18" woofers work? Has it been tried? What compromises would be made?

My goal is a system with a little more SPL using the corner horn design.
