You've got mail!

I've sent the standard plans and added an attachment that shows the dimensions for the bass bin for the JBL 2242 or 2245 woofers. Some other high-efficiency 18" woofers will work in this cabinet too - It's 7.5ft3 tuned to 30Hz.

Use the crossover, midhorn and tweeter as shown in the plans. Don't substitute drivers in those because they're more critical to the design. Options for midhorn and tweeter are shown in the plans.
