Subject: Qubic modular power?

This Qubic "modular system" system (more details) has started showing up in the local Currys. It looks pretty good, plug sockets, surge protectors, USB chargers, audio and network protection modules as modules etc and you just connect them up to make an extension lead with everything you need. It would save me a few sockets and separate units!

It is also really expensive, to the point where I don't want to buy it just to play! Has anyone tried using this stuff? I have my doubts it can be as simple as it looks.
