Hello. A couple of years ago, I went to Stone Mountain and they had a movie playing (I can't remember the name for the life of me.) Anyways, instead of just regular 3-D where it mainly focuses on visuals, they also incorporated the other senses. Like for example, when it was raining in the movie it started to also rain slightly in the movie theater and when the wind blew in the movie it blew in the theater. So maybe advancing that is next?
