Hi Scott,It's real easy to change your E-Mail address.  Just type in the new one next time you post.  If you have cookies enabled in your browser, it will remember your E-Mail address (and password, if you're registered) and use it for all subsequent posts.  If you don't have cookies enabled, you'll just have to type in your E-Mail address and/or password each time you write a message.  ART stores username, password and E-Mail address in a cookie, and uses it to fill in the user fields for convenience sake.Wayne
