Lark wrote on Wed, 03 May 2017 18:15 It's no longer under warranty, that's why I was worried. I think I will take your advice and have a professional look it over. Hopefully it makes sense to fix it rather than having to buy a new one.

As far as I know, a warranty never caters for repairs resulting from human fault. I think it will be helpful if you approached someone else to repair it for you. It might be something that can easily be fixed.
