Amber wrote on Fri, 26 May 2017 12:20Hey guys, are there any brands that you love enough to buy all of your technology from? For example, is your TV, headphones, and speaker(s) all from one brand?
Interestingly, they are all from different brands. I'm never really keen on the brand; functionality is more important when considering electronics and sound equipment in general. On the flip side, there are companies that have made a name over the years and people tend to have a bias for them.
