Subject: Re: External harddrive Posted by gofar99 on Wed, 31 May 2017 22:21:53 GMT View Forum Message <> Reply to Message

Hi There are a number of ways to do this. You can just get an external backup drive that plugs into the USB port. Ones up to about 2 gig are reasonable in price. My preferred solution is a little different. I got an external hard drive dock (many companies make them and they are often under \$25). It plugs into a USB port. This way I can use cheaper regular PC hard drives. The cost per drive is about 1/2 that of the external back up types. This is especially true in the larger drives. Cheap plastic cases are available for them as well. Although a zip bag will do fine and just put them in a safe place when not needed.
