Subject: Pi 4 vs JBL 4430? Wayne?

I built the Pi 4s years ago and love them. I have since acquired JBL 4430s and now love them both. My questions are (LF extension notwithstanding): is the 45 x 90 vs the 100 x 100 degrees dispersion angle making me like the 4 Pi more? Are there drawbacks in the JBL horn, or is it just the more focused dispersion of the 4 Pi horn/waveguide is the only difference?
