Wayne; In the words of our late lamented ex-president Reagan; "There you go again", subtly aligning my position with the foggy headed subjectivists by suggesting the yen and yang thing. The right brain left brain thing, a very easily invoked diagnoses that in reality is extremely complicated theoretically; another one of those urban myths that were pre-empted by the media into one word descriptions of barely understood phenomena. Sorta like audio measurements. I think Taste of Tubes was a mole. A Plant. Someone looking to foment discord. Whatta you think? J.R.
