Kirkman wrote on Tue, 29 August 2017 17:55 From what I've experienced it's different depending on your brand of speaker, the size, shape, and style of the room, and the set-up you use. I've not invested the time myself to learn the science of it all, but with some trial and error, I've found the best set-up for my latest space.

The trial-and-error method has worked for me as well in the past. Understanding the science of it all isn't easy and the uniqueness of each system and rooms makes it hard to standardize a 'perfect' listening position.
