These are fantastic subwoofers, but I have no need for a mobile setup anymore. Would love to sell to somebody that appreciates the work Wayne put into designing these. They are large, but they get super loud with very little wattage.

These are fantastic cabinets in pairs. Plans are freely available on this site as well.

Price breakdown:
Drivers - $700
Cooling plugs (x4) - $140
Cooling plates (x4) - $260

That's $1,100 + tax & shipping right there. The wood + hardware + time + effort is worth MUCH more than $300

Hit me up, looking to sell ASAP.

Josh Billings
