Two questions:1.) Is it possible to find this article? In one old "Glass Audio" I found this mentioned like "the definitive explanation" of the theory of PP pair:Melehay:"Push-Pull Audio Amplifier Theory", Trans. IRE on Audio, Jul./Aug. 1957., pp. 86-89I`m interested what "definitive" explanation says (on 4 pages?!)... Most of the sources we have, IMO are not 100% "definitive".2.) Who is Thrintun?
