Thanks Wayne, but the most important thing is that they just play live and real!
And this is only thanks to your skills as a designer!

Until now every single change I made to the stereo system was clearly distinguishable thanks to their transparency!

These days with my friend who built my current preamp and final, we tried different output stages for my dac (built inside the box of an old Denon dvd-2800!), Your speakers have allowed me to hear every difference, and therefore to choose the one that was the most correct for me!
