Hi Max

Checked your build thread, very nice!!!

I won't be running any subs so its great to hear that they go low. Don't know what it'll be in my space since it's about 60m2 and has a 3.5m ceiling height...

issue if I tried to bring big ones into the living room.

I blame the bloody design magazines which are filled with white small speakers in sterile white

Ok, need to start gathering parts for my build. Won't happen overnight but I'll get there! Btw Strange that a simple thing like the resistor can't be found in Europe?
