Well, there's <http://audioheritage.org/intro.htm> to look at, though I don't see much about transformers. I have an old Peerless catalog. S-256-Q is 40 watts rating, primary 5000 ohms CT, secondary taps for 16, 12, 8, 4 and 2 ohms. Max DC in primary is 120 mA balanced, 12 mA unbal. S-258 isn't in here, sorry. I THINK it is the same except with UL taps at 25%, or 1250 ohms.
