I agree with you, Bruce. It isn't high-end.

But I was surprised to see that it wasn't really low-end either. I kind of half-expected one of those cheapo plastic tables with wheel-roller drive and a ceramic cartridge on a plastic arm with spring loading.

This table actually looks like it might be on the level of the entry-level Rega tables. Not sure about the arm, nor of the cartridge. Hard to say without having one of those Sony tables to examine. But I do think it might be decent for an entry-level offering.
