I looked at the site and they have speakers priced from \$199 to a base speaker at \$699. You can a One for \$199 that does the following:

Start and control your music with your voice. Amazon Alexa built right in.

Play songs, check news and traffic, manage smart devices and enjoy all those other helpful Amazon Alexa skills using a single Sonos speaker.

Combine voice with the Sonos app to manage all your music in one place: Amazon Music, Spotify, Apple Music, internet radio and hundreds of other streaming services.

Connect wirelessly to other Sonos Home Sound System speakers to play music in any or every room.

Enjoy surprisingly rich, room-filling sound from a smart speaker.
Seamless all-black or all-white color with the smooth matte finish for an appearance that fits in any home.
