I agree. Sirius is the best for vehicles. I've never used it in a home though, mainly because I don't really listen to the radio unless I'm in the car. I think Sirius is typically easier to use when I'm driving because I can control it on my steering wheel. I don't have to mess with my phone like I would with YouTube. I'm also lazy and don't like to create playlists. I would rather have someone else do the work for me. I can also listen to sports or the news with Sirius as well.
