Audacity seems like the go-to for free products that do this. I don't really know of any other alternatives. I've seen some similar complaints though. Some people fixed it by updating to the most recent version. Are you using 2.2.2? If you're willing to pay, Adobe Audition is excellent. It's on sale right now for $19.99/month if you want to give it a go. I don't think they do free trials for this program but I could be wrong!
