Pique wrote on Sun, 04 February 2018 16:24I read an article online which stated that the best way to get sound quality was to use rugs on the walls, and then another article said that was ineffective. There's just too much conflicting information online these days. I don't know what to believe anymore.

They say that softer objects absorb sound faster, so I guess the range of different carpet types is what would affect peoples opinion on how effective it is.
