Hello manualblock!I have quite small listening room about 16m2. My pre-amp is DensenBeat B-200 and speakers are Amphion Krypton (www.amphion.fi). Theyare large speakers with panel-like sound, very high resolution and very dynamic (price 10 000 euro). The amplifier sound what I`m looking for is close, palpable and musically. If you have some experience about Manstersound or BAT, please, let me know.
