Hello manualblock! I have quite small listening room about 16m2. My pre-amp is DensenBeat B-200 and speakers are Amphion Krypton (www.amphion.fi). They are large speakers with panel-like sound, very high resolution and very dynamic (price 10 000 euro). The amplifier sound what I'm looking for is close, palpable and musically. If you have some experience about Manstersound or BAT, please, let me know.
