Final photos:

Started out with the JBL 2123H drivers for the Midhorn, but transitioned to a pair of JBL 2012H drivers I had re-coned with genuine JBL re-cone kit). All JBL Pro drivers, which was a goal.

Decided the 4 Pi in the center was out of place, but due to not having an acoustically transparent screen had to come with a different plan (one that used the JBL 2226H's from the previous 4 Pi speakers).

Overall I am very pleased with the system. Running active with a dbx Venu360 processor (and a stack of Crown amps).
