Subject: Re: Amp under desk Posted by gofar99 on Tue, 03 Apr 2018 02:29:32 GMT View Forum Message <> Reply to Message

Hi That would depend on the amp. If it is a class D one then probably nearly no clearance is needed as they put out little heat. If it is a large class A tube amp...then at least 6 inches all around and IMO I would not put one there in the first place. I have put PCs under the desk on occasion...but with plenty of clearance ...especially around the back where many have fans.
