Subject: Re: Does the Amazon Echo finish impact sound? Posted by johnnycamp5 on Sun, 08 Apr 2018 20:00:48 GMT View Forum Message <> Reply to Message

I don't think they do... or at least, I don't think they "should".

Ive always thought of the enclosure and driver baffles of a loudspeaker to be inert, and therefore indifferent (acoustically) to what they are finished with.

I have understood (perhaps in error) that this is not the case with very thin walled "acoustic" instruments such as guitars/violins and such.
