I also think kits are a great way to start.

This looks like a nice, relatively inexpensive class A (solid state) amplifier kit, but I am unsure of how good the build guide is-

Of course, if you want the "bees knees" of kits, I would point you to Bruce's Odd Watt Audio kits. They use vacuum tubes after all-

http://www.oddwattaudio.com/owproducts.html

I built a couple of his mono blocks, and the directions (build manual) are excellent.

After all, if an old, mason by trade like me can do it, anyone can
