Hi Wayne,

after bringing my 2Pi Tower to the maximum of my ability, I would like to try to build the 3Pi bass reflex.

I read this thread very carefully:

https://audioroundtable.com/forum/index.php?t=msg&goto=67292&&srch=2+pi+tower+versus+3+pi#msg_67292

and it seems to me that the 3Pi go right in the direction of my current listening expectations.

Could you send me the construction plans for the 3Pi, please?

Thanks

Giampiero - Italy

PS: sorry for my bad english
