lindasharp wrote on Mon, 14 May 2018 21:25 Yes, to extract the audio tracks from YouTube videos for use, VideoSolo Free Video Converter does a good job in this. And it provides MP3, WAV, AAC, etc audio formats for you. After extracting, you can listen to the audio track on any devices. <https://www.videosolo.com/free-video-converter/>

Do these sorts of apps disrupt the quality of the audio? I've always been concerned about that, on top of all of the potential legality issues.
