Is anyone else on here a fan of Bang & Olufsen audio equipment? I don't own any as yet, but am interested in acquiring some when I have the spare cash to do so.

I want to get a B&O amp, vinyl record deck, CD player and speakers. I may end up doing this by buying second hand.

A friend of mine has an audio system of B&O components from the 1970's, and it is pretty impressive.
