Subject: Cabinet for subwoofer.. bad idea?

Hi everyone. First off: I'm not an expert builder, I've only built little things like spice racks, but I am looking to build a cabinet for my subwoofer. I do not like the look of it, so I hope that I can make it into something nicer, but I am wondering if this is a good idea at all or if it will mess with the sound too much (if I keep the front of it clear). I am open to suggestions about what materials are best or might even enhance the sound..? It's the Bose B1 Bass Module by the way.
